Unit Testing, Integration Testing

Tools & Platforms:

Docker, Vercel, GitHub, Strapi, WordPress, HubSpot, Figma

Databases:

MySQL

Methodologies:

Agile, Scrum

ANA YAGHOUBI

SOFTWARE DEVELOPER

ABOUT ME

Experience building responsive web applications, frontend interfaces, CMS-driven platforms, backend APIs, and business solutions using technologies such as React, Next.js, .NET, HubSpot CMS, and Power Platform. Analytical and solution-oriented mindset with a focus on maintainable code, clean user experiences, and scalable digital solutions. Fast learner, adaptable, and motivated to continuously explore new technologies and development workflows.

EDUCATION

AP Hogeschool

09/2021 - 01/2026

Associate Degree in Programming
Graduated with distinction

CVO Antwerpen

2017 - 2021

ICT and Administration
Successfully completed

EXPERIENCE

MakeWaves

09/2025 - 12/2025

Front-end Developer Intern

- Built front-end components using Alpine.js, Tailwind CSS, HubSpot CMS, and Splide.js.
- Translated UI designs into functional and pixel-perfect webpages.
- Developed a multi-brand email signature generator with live preview and copy-to-clipboard functionality.
- Worked with HubL, HubDB, and reusable CMS modules.
- Worked on analysis, development, testing, and technical documentation for CMS-based solutions.
- Agile collaboration with designers & developers.

Recommendation letter available upon request

Horeca & Catering

2023 - present

Kitchen Staff / Prep Cook (Student job)

- Accurate & efficient work: quality control, hygiene, following procedures.
- Teamwork & communication in fast-paced work environments.

Bibliotheek Stad Antwerpen

07/2025 - 08/2025

Staff Member (Student job)

- Assisted with digital content and social media communication.
- Worked with digital systems and databases for registration and research tasks.
- Supported employees with basic IT-related questions and technical troubleshooting.
- Assisted visitors with customer-oriented communication and information support.
- Organized and categorized books and library materials within structured library systems.

Email Signature Generator

HUBSPOT CMS, HUBL, ALPINE.JS, TAILWIND, JAVASCRIPT

A custom HubSpot CMS module designed to support multiple company brands through a scalable architecture. Developed during my internship, it allows users to generate professional signatures with real-time previews and copy-to-clipboard functionality.

- Separated branding, presentation, and logic into structured layers.
- Data handled via HubDB allowing brand-specific layout generation.
- Responsive form with real-time previews powered by Alpine.js.
- Outlook-compatible email signature HTML formatting.
- Form validation, placeholder handling, and error handling for improved UX.
- Worked on analysis, development, testing, and documentation.

Pension Architects – Pension Portal Migration

REACT, TYPESCRIPT, MATERIAL UI, MUI DATAGRID, REACT CONTEXT API, REACT-I18NEXT, REST APIS

Team-based academic project developed for Pension Architects as part of the AP Hogeschool IT Case program, focused on modernising a legacy pension administration platform by rebuilding selected user workflows from Apache Tapestry in a modern React-based frontend architecture.

- Developed responsive React interfaces for pension management, user profiles, document management, and internal communication workflows.
- Built reusable React components and modular frontend structures to support maintainability and future scalability.
- Implemented multilingual support (Dutch, French, German, and English) using react-i18next.
- Integrated REST APIs based on OpenAPI/Swagger specifications and managed shared application state through React Context API.
- Developed data-driven user interfaces using Material UI, MUI DataGrid, and interactive chart components.
- Collaborated within an Agile development team through sprint planning, refinement sessions, stand-ups, and project presentations.

Project Management App

POWER APPS, DATAVERSE, POWER AUTOMATE

A low-code Power Platform solution designed to help project managers create, manage, and track projects through automated Microsoft Teams integration. Built with a structured and maintainable architecture.

- Relational Dataverse data model using multiple connected tables.
- Automatic Microsoft Teams channel creation via Power Automate.
- Microsoft Entra ID / Office365Users integration for user assignment.
- Robust validation and status tracking UX.

Hotel Management API

ASP.NET CORE, C#, ENTITY FRAMEWORK CORE, MYSQL, SWAGGER, MSTEST, MOQ

A RESTful backend API built with ASP.NET Core and Entity Framework Core to manage hotels, cities, and countries through a relational database structure.

- CRUD operations across related entities: Countries, Cities, and Hotels.
- Repository Pattern architecture with Dependency Injection.
- Swagger/OpenAPI documentation for endpoint testing and API exploration.
- Entity Framework Core migrations and model validation using Data Annotations.
- Unit testing implementation with MSTest and Moq.

STUA – Students & Antwerp

WORDPRESS, PHP, ULTIMATE MEMBER, THE EVENTS CALENDAR, WPFORMS

A WordPress-based platform developed for a student association in Antwerp, featuring user authentication, role-based access control, study specific agendas, and event management.

- Implemented protected member-only areas and customized content visibility based on user roles.
- Integrated and customized multiple WordPress plugins to deliver a unified and user-friendly experience.
- Structured dynamic event agendas and personalized content for different study groups.
- Integrated event calendars, GDPR compliance, and SEO optimization through WordPress plugins.
